

Module: m/01/102

'Configuring the calculation service...''

*The calculation service performs **one** task:*

- Calculating hours worked against pre-defined daily and period schedules.*

*Remember that the calculation service will **not** run unless there has been a successful hardware poll within the last sixty minutes.*

If this service stops running, timeware® will not be able to assign people to schedules or calculate their hours worked.

*Please note that this service **does not** require any configuration.*

The Calculation Agent icon looks like this:

The Calculation agent will not work until you start this service, (see module m/01/008).

Notes

Training module: m-01-102 *Configuring calculation service...*
